

TYGRIS TECHNICAL DATA SHEET

Industrial Maintenance Aerosols

Barrier Cream

CODE: **R250**

Industrial-grade hand protection hand cream

A high quality water based blend of skin-care ingredients used to protect hands from industrial soiling. Contains conditioners, humectants and emollients to retain skin freshness and replenish moisture, and an anti-microbial agent to protect against infection. Use before and after work for maximum effect.

Benefits:

Use before work to protect hands from soiling
Use after washing to moisturise and replenish skin

Protects against dilute acids, alkalis, paints, resins, epoxies, plastics, inks, tars and petroleum solvents

Non-greasy

Guards against skin cracking, irritation and infection, with a pleasant perfume

Incorporates bactericide

Easily removed with soap and water

Sprays on as a foam which collapses for maximum penetration

Technical Data:

Appearance:

White foam

Odour:

Pleasant perfume

Contents:

Blend of water, sorbitol, cetearyl alcohol, triethanolamine, C9-C11 pareth 6, glycerine, lanolin, sodium benzoate, stearic acid, triclosan, perfume and butane/propane propellant.

Storage:

Below 50°C

Flash Point:

<0°C

pH:

7.0-9.5

Viscosity:

1000cPs

Solubility:

Soluble in water

Pack Sizes:

12 x 400ml cans

Directions for Use:

Apply to hands before starting work, working well into the skin and under the fingernails. Re-apply where necessary. Use as a moisturiser once hands are washed after work.
