

The MHA is a galvanised mini joist hanger suitable for use with regularised timber, rough sawn timber, I-Joists and LVL.

FEATURES

Material

Pre-galvanised mild steel

TECHNICAL DATA

Product Dimensions

References	Hanger Dimensions [mm]				Holes	
	A	B	C	t	Header	Joist
					Ø4.1	Ø4.1

Note: Fasteners quantity and performance values are for 2 No MHA hangers

INSTALLATION

INSTALLATION NOTES

For solid header fill all nail holes. For I-Joist headers fill the bottom two nail holes on each side.

- Hanger depth should be at least 60% of carried member depth to prevent rotation. If less than 60%, then additional lateral restraint to the top of the carried member is required.

Solid Headers

Install 5 header nails per side **[A]** and install 3 joist nails per side **[B]**. Fasteners as stated in the relevant performance tables.

I-Joist Headers

For I-joist headers, 2 hangers are required; one top and one bottom

Fill the bottom 2 nail holes on each side; 2 header nails per side **[C]** and 2 joist nails per side **[D]**
