**Assignment Report**

**Testing of water tightness for Fibro Trespo bathroom panels using grout, type CT1 Sealant and Construction Adhesive**

Summary			
<b>Background</b> SINTEF Byggforsk have on behalf of C-Tec Ltd tried water tightness of Fibro Trespo bathroom panels with use of CT1 Sealant and Construction Adhesive for sealing vertical joints, profile lists as well as in connection with pipe penetrations of bathroom panels. This is an abstract translated from the Norwegian report.			
<b>Test Methods</b> Testing was conducted in accordance to: "Guideline for European Technical Approval of watertight covering kits for wet room floors and or walls" (ETAG 022), Annex E and B. In addition, it was conducted additional tests of Annex F.			
<b>Results</b> The test is passed. The following components were included in the test:			
<ul style="list-style-type: none"> <li>▪ Fibro Trespo bathroom panels</li> <li>▪ CT1 Sealant and Construction Adhesive for sealing vertical joints against profiles, around the copper pipes and bonding rubber cuffs to the wall boxes</li> <li>▪ Profiles in aluminium for inside and outside corners and for lower base profile</li> <li>▪ Profiles in PVC for inside and outside corners</li> <li>▪ Wall boxes from Sanipex with corresponding rubberized cuffs</li> <li>▪ 15 mm copper pipes</li> <li>▪ Wall brackets for water basin</li> </ul>
